

# Manolis Ntamadakis

## Web Developer

"The only constant in life is change" - Heraclitus -

I am of the opinion that all people should love change. Man's evolutionary potential is based on the risk of change. For something new. For something unknown. So I want to learn new things that will make me a man of my time. The age of rapidly evolving technology.

Graduating (only the diploma thesis remains) at the Department of Computer Engineering of the Mediterranean University of Crete (former TEI of Crete)

## SPECIAL KNOWLEDGE

- Front-end (HTML5, CSS3, JS, ReactJS, NextJs)
- WordPress (Bricks Builder, Elementor, WooCommerce)
- SEO

## GENERAL KNOWLEDGE

- Framework JS:  
Vue.js, jQuery, ReactNative
- Back-end:  
Node.js, Native PHP, MySQL, MongoDB, Firebase
- Adobe:  
Photoshop, Illustrator, Premiere

## LANGUAGES

Greek

English

## Experience → Perspective

### 2018-2019

Hellenic Mediterranean University

#### Hardware Support (Practice)

In the internship, I worked on the lab setup of TEI of Crete from scratch. I assimilated knowledge on Format, hardware problem-solving and network problem-solving.

### 2019 - 2020

I have completed my military duties

### 2020 - 2021

Digital Soul Agency | Kolimbari Chania, Crete, Greece

#### Web Developer

In my first job as a Web Developer, I created my first sites for hotels and e-shop. I got knowledge on logo design and graphic design for the sites we implemented (Photoshop)

### 2021 - Present

IMMKO | Chania, Crete, Greece

#### Web Developer

Thanks to IMMKO I have developed my knowledge of several technologies. My main responsibility is the creation and support of web sites for over 200 IMMKO partners. The main knowledge I have acquired is on HTML5, CSS3, JS, React.js, Next.js, PHP, WORDPRESS, JOOMLA, OPENCART. But primarily I have specialized:

- 1) On creating responsive websites to the needs of our partners, either in collaboration with an external partner (Graphic Designer), or with our own design.
- 2) On correcting themes and plugins to meet W3C and Web Accessibility specifications for partners who have entered into NSRF programs.
- 3) Over WordPress theme/page builders (Bricks Builder, Elementor pro, WPBakery).
- 4) On top of plugins like WooCommerce to create e-shop pages. As well as adding these eshops to platforms like skrouz and bestprice.
- 5) On creating small plugins to incorporate some necessary functionality that we needed.

### Future

#### Full Stack Developer

I'm very interested in my development on frameworks like those of React.js, Next.js, vue.js and node.js. I am also very interested in my development on mobile frameworks like flutter and React Native. Furthermore, I would love to be able to support complex web applications and also android and iOS applications at some point in the future
